March 2nd - Air Scrubber @ NW College of Construction

The **March Product Update meeting** is scheduled to be held at the NW College of Construction, 11:30AM, March 2, 2017. This **meeting and Lunch are sponsored by GENSCO.**

This meeting qualifies for 1.0 NATE CEU credits

Dave Thomas, Sales Manager - Northwest/ Mid-West at Air Scrubber Plus will present on this exciting product line.

Why Is Air Scrubber Plus® Different?

Most indoor air purification and filter systems use passive technology to circulate the air in the home through a filtration system. However, this system fails to clean surfaces that carry millions of germs, like doorknobs, toilets, kitchen counters, and pet areas. Air Scrubber Plus® cleans and disinfects the air and surfaces of your home, reducing up to 99.9% of surface micro-organisms and 90% of airborne micro-organisms. The most highly respected labs in the country have tested and validated the effectiveness of the Air Scrubber Plus® filtration system.

Does Air Scrubber Plus® Eliminate Odors?

Working through your heating and air conditioning units, Air Scrubber Plus® uses specialized germicidal UV light waves along with a proprietary catalytic process to reduce dust, pet dander, and odors in your home. You will be able to reduce common smells such as pet odor, cigarette smoke, paint fumes, mold smells and the occasional burnt food odor.

Can Air Scrubber Plus® Help Reduce Allergy Symptoms?

Air Scrubber Plus® has been clinically proven to reduce dust, mold, pollen and many of the other pollutants that can cause irritation and allergies symptoms.

How Does Air Scrubber Plus® Protect My Expensive HVAC System?

Working through your heating and air conditioning units, Air Scrubber Plus® uses specialized germicidal UV light waves along with a proprietary catalytic process to reduce dust, pet dander, and odors in your home. You will be able to reduce common smells such as pet odor, cigarette smoke, paint fumes, mold smells, and the occasional burnt food odor.

What Is ActivePure™ Technology?

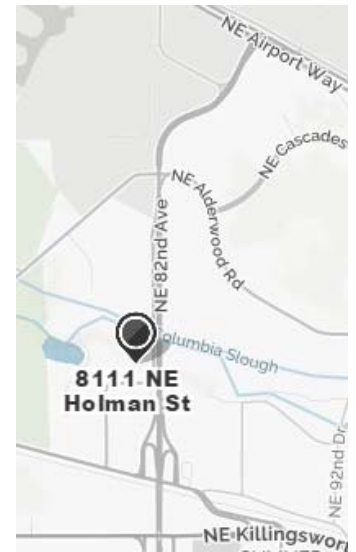

ActivePure™ Technology is based on a variation of the technology originally developed for use in the International Space Station and is recognized as the exclusive Certified Space Technology by the Space Foundation in its category. The Certified Space Technology logo is licensed to activTek by the Space Foundation for use on Air Scrubber Plus purification products.

How Is Air Scrubber Plus® Different From A Filter Or A UV Light?

A filter or a UV light functions as a trap. It is only effective with what comes to it. The ActivePure™ scrubbers produced by the Air Scrubber Plus® act offensively – going out to get the irritating or unhealthy contaminants that we don't want in our home. This technology copies what nature does outside. Notice there are no filters outside in nature.

Press Release from Federated Insurance

Vehicle crashes in the US are a very serious problem. In fact, 2016 resulted in being a record breaking year for both traffic related injuries and fatalities. Federated Insurance is very concerned about the persistence of this trend and how it can adversely affect your members' businesses and what they could lose as a result.

Similar to our previous In the Blink of An Eye (2010) and What Is Important to You? (2015) awareness campaigns, we have re-energized our efforts to help business owners address their employees' driving. Our newest program is Drive S.A.F.E. The acronym refers to the all-too-common causes of vehicle crashes, Speed, Attention, Fatigue, and Emotion. With our clients and with you, each of risky behaviors be addressed quarterly going forward.

Federated Insurance is ready to help you and your members reduce vehicle crashes and fatalities. Our marketing representatives are prepared to discuss this disturbing trend with any member who is willing to address the issue, and can recommend resources and

best practices that owners can incorporate into their company's risk management program.

You may request a copy of a press release and article from the ORACCA office. Feel free to use it in your print and e-communications with your employees. Also, please contact your account executive with feedback or ideas that can help us provide value to both you and your employees.

We hope you agree with Federated that it's up to each of us to make driving S.A.F.E. a priority. The lives of everyone important to us may depend on it. Thank you for your partnership and we look forward to continuing to work with you to provide your employees with the very best insurance and risk management services.

HAVE A DISAGREEMENT WITH A CODE INSPECTOR'S DECISION? YOU CAN APPEAL TO BCD.
You can use this form to appeal any inspector's decision, whether they are a city, county or state employee.
