## February 4th @ Mar-Hy Product Program Update for 2016

### Honeywell

The **February Product Update meeting** is scheduled to be held at MAR-HY 3850 International Way, Milwaukie, OR at 11:30AM, Thursday, February 4th.

**This meeting qualifies for 1.5 NATE CEU credits**

This month's meeting topic: Honeywell Smart Thermostats. Our presenter is Ed Impala.

Did you know there are over 15 models of Honeywell thermostats offered that connect to the web?

Do you understand the difference between WIFI and Wireless?

Understanding RedLink and all of the accessories offered.

Connect any RedLINK™ Comfort System to the Internet to provide your customers with remote access from their PC, smart phone or tablet using Honeywell's RedLINK Internet Gateway.

Total Connect Comfort allows users to:

- Program scheduling\*
- View and change their HVAC system settings (Heat, Cool, Fan, Dehumidifier\*, Humidifier\*)

- View and set the temperature
- View and set indoor humidity\*
- View outdoor temperature and humidity2
- Access multiple thermostats if the system is zoned
- Access multiple locations if more than one system is connected
- Receive temperature and humidity alerts via e-mail
- Access over 90 system alerts via the web.
- Get automatic upgrades as new features are available

From Honeywell, the largest seller of web enabled/Smart thermostats in the country.

### DuraVent

Our second presenter(s) are Pat Burke and Phil Canby, who will discuss the exciting new DuraVent product that allows combined category I and IV venting for 90 plus upgrades with no side venting.

FasNSeal 80/90 is a unique, patent pending system that exhausts 90+ condensing appliances with Type B atmospheric units within the same vent.

Using your pre-existing common vent, our cap improves the operation of both the remaining atmospheric appliances, and the new condensing unit, while not disturbing finished space during installation.

Finally a solution when you need to deal with narrow lot lines, clearance to window and door openings or when side wall venting just isn't practical.
