8:00AM - 12:00PM

NATE On-Line Test

Registration limited to the first 18 applicants

Test Site

The testing site will be sent to each participant upon registration.. Each participant must have photo ID.

What to Bring

- Photo Identification.
- Your NATE ID number if you have one.
- Password(s). You will receive and email from NATE with the password(s) necessary to take the test. So register well before the test date.
- A non-programmable calculator

Training is available through the ORACCA On-Line E-Learning program. It consists of on demand video test preparation dealing with special emphasis on the Core and Gas Heat or Heat Pump sections. You can choose which of the training modules and tests you wish to participate in. Each individual is responsible for participating in the training, if they so desire.

On the specified test date, each participant will take the proctored NATE test(s) on line. Once the applicant has finished the test(s) on line, each applicant will have on line access to their pass/fail status on the test.

Testing On-line: Each applicant wishing to participate in this NATE testing session must fill out the registration form and return it to ORACCA Headquarters. You will be notified of test specifics and will be sent the link to the study guides, once you have registered. We must pre-register each participant with the NATE testing site well prior to the test date. Once registered you will receive two emails. One from SeminarWeb with information on how to access the On-Line training video. And, one from Castle Worldwide with your passwords for the tests. This password is necessary to be able to access the test, so be sure to bring it with you on test day. As you can well imagine, early registration is key to being able to receive your password in time for the test. Do not delay.

Between registration and the test date, please spend time going over the study material and the On-Line video material. Do not expect to walk in and pass the test. The odds are against it. We send this information so that you can prepare for the material involved with the actual test. Our pass rate with participants who take this seriously is in the 90% range. If you study, the odds are that you will get your NATE certification. If you don't study, well....., so make the investment with your time.

If you have any further questions, please call us at
