Are your Technician's Certified to work on sealed systems?

Section 608 of the Federal Clean Air Act requires that all persons who maintain, service, repair, or dispose of appliances that contain regulated refrigerants, be certified in proper refrigerant handling techniques as of November 14, 1994. It has been a long time since that date and some coming into the industry may not even be aware of this regulation. But it is still a requirement for the HVAC/R industry.

ORACCA Study Manual

ORACCA's Section 608 Training Manual is intended to prepare technicians for the certification test, and contains all the information a technician will require to successfully complete the test. This booklet is not intended to be a formal refrigeration training course. It now includes Over 180 sample test questions plus a solid review of the fundamentals of refrigeration and air-conditioning systems, components, and configurations.

The manual condenses the body of knowledge needed to get 608 Type I, II, III and or Universal certification within its 140 pages. Designed for non-certified technicians who already have a working knowledge of the trade.

The test itself is scheduled with your calendar in mind. Once you have had time to thoroughly read and understand the material in the study manual and feel comfortable to take the test, contact the ORACCA office to set a date that works for both you and the proctor.

For Spanish language only tests and study material, see the registration form. The online video is available only in English.

ORACCA On-Demand Video Training

ORACCA's On-Demand Video Training Program consists of four hours of On-Line Video Training with special emphasis on Section 608 Clean Air Act. The program will mark where you stop, so you can review the material at your leisure. This allows the participant to fast forward or rewind to recover areas of the training that require more review.

Once registered you will receive log on information to access the E-Learning site to view the video training, so register early and give yourself time to go through both your written study material and this training video, so you will stand the best chance of passing the exam.

Before the test date, plan to spend time going over the video and study material. Do not expect to walk in pass the test with no review.

Refrigerant Transition and Recovery Certification Program

The November 1994 deadline has come and gone for the EPA mandatory certification for all technicians, installers, contractors, and the like, who are involved with refrigerant handling.

ORACCA has arranged for On-Demand Video training, presented by Richard Stilwill. This four hour video training session is intended to prepare the participants for the required certification testing.

The test itself is scheduled with yours and the Proctor's calendar in mind. Once you have had time to thoroughly read and understand the material in the study manual and feel comfortable to take the test, contact the ORACCA office to set a date that works for both you and the proctor.

The test must be ordered and takes a minimum of ten days to arrive. So the date that is set is based upon a mutually selected date that includes the ten day lead time for the test to arrive.

The Certification Types as specified by section 608 of the Clean Air Act, are as follows:

Core	Must be taken in addition to the specific levels listed below	- 25 Questions
Type I	Small Appliances with 5 pounds of less Refrigerant	- 25 Questions
Type II	High Pressure and Very High Pressure Appliances	- 25 Questions
Type III	Low Pressure Appliances.	- 25 Questions

We urge you to seriously study the course book, available through ORACCA. The materials contained in the book will help you to achieve a passing grade in a level (Type I, II, or III) in which you have expertise and practical experience. This is a closed book test. No study aid materials of any kind are allowed in the testing area. Pencils and pressure/temperature charts are provided.

We are limited to the first 3 applicants for this test. Please return your application form as soon as possible in order to insure a reservation.

For further information on the certification examination, please contact the ORACCA association headquarters by writing: ORACCA, P.O. Box 87907, Vancouver, WA. 98687-7907 or by calling 360-834-3805. Fax 503-914-1999.

Important student notes

- √ During this session , our presenter will review the pertinent sections of the ORACCA manual.
- √ The Tests will be scored by the Exam source. Allow several weeks for results.
- √ In order to obtain certification, applicants must pass the core exam, in addition to successful completion of each certification level you wish to obtain. (70% is passing)
- √ Materials required for the Test are: Number 2 pencils, and Temperature/Pressure chart, **both supplied by ORACCA.**
- √ The National average passing rate for the exam is presently only 50%. *The pass rate for the tests given to date by the ORACCA in Portland have averaged 96% pass rate.* Please get your book early and study for this examination, prior to the test.
- √ **The cost for the ORACCA study manual, On-Demand Study Video and the CFC certification exam are shown on the registration form** To insure a firm reservation for the exam, return this form **with your check or Credit card information** for the appropriate amount. Space is limited to 3 participants...so register early.
